- (1.) PROTECTION / SENTINEL (REQUIRES TIMELY RESPONSE)**
- (2.) HEALTH PROMOTION / EDUCATION / RISK REDUCTION**
- (3.) PREVENTION OF DISEASE / DISABILITY / PREMATURE DEATH**

Kentucky has made progress in the collection and analysis of health data via the Kentucky Health Policy Board, Data Section, created by a legislative mandate in 1994. Fifty-six data elements form the basis of the Kentucky Health Claims model. Currently these data are being collected from discharge data that are reported by hospitals and by free standing outpatient providers. The data will provide an additional source to use in developing a framework for public health policy. Responsibility for data collection was transferred to the Cabinet for Health Services with the abolition of the Health Policy Board by the 1996 General Assembly.

**OBJECTIVE 22.1.** By 1992, identify, and create where necessary, data sources necessary to track and evaluate progress toward each of the Year 2000 Kentucky and national health objectives. (Relates to National Objective 22.2).

**OBJECTIVE 22.2.** Within one year of dissemination by the Federal government of a set of common data elements for each of the Year 2000 National Health Objectives priority areas, assure that these common data elements are collected in Kentucky and made available to program managers and other health professionals. (Relates to National Objective 22.3).

**OBJECTIVE 22.3.** Within one year of dissemination by the Federal government of a set of health status indicators, assure that these indicators are collected in Kentucky and made available to program managers and other health professionals. (Relates to National Objective 22.2).

**OBJECTIVE 22.4.** By 1992, design, conduct, analyze, and report to the public and to health professionals a combined health interview - health examination survey of a representative sample of Kentuckians. The survey should be designed primarily to provide baseline data for the Year 2000 Objectives. A comparable survey should also be conducted in 2000, and, if resources permit, in 1995. (No corresponding National Objective).

**OBJECTIVE 22.5.** In 1995 and again in 2000, disseminate to the public and to health professionals an analysis of Kentucky's progress toward meeting each of the Year 2000 Objectives. (Relates to National Objective 22.5).

**OBJECTIVE 22.6.** By 1992, design and implement an integrated environmental hazards database which includes measures of health outcomes or exposure. (No comparable National Objective).

#### **DATA SOURCES**

- Division of Epidemiology, Department for Health Services, Cabinet for Health Services

C. COMMUNICABLE DISEASE CONTROL

(1.) REPORT ANIMAL BITES WITHIN 12 HOURS

	KY 2010 Objectives OR Other Benchmarks/Guidelines	County 1 year Objectives
•Reported to the health department		
-Medical care sought		
-Medical care not sought		

(2.) REPORTABLE DISEASES (EPI 200)

	KY 2010 Objectives OR Other Benchmarks/Guidelines	County 1 year Objectives
•Report within 24 hrs		
•Report within one (1) business day		
•Report within five (5) business days		
•Report on a weekly basis		

(3.) MONITORING NON-REPORTABLE DISEASES

	KY 2010 Objectives OR Other Benchmarks/ Guidelines	County 1 year Objectives
•Infant/Pre-School
